

CITY OF SANTA BARBARA

COUNCIL AGENDA REPORT

AGENDA DATE: October 9, 2007

TO: Mayor and Councilmembers

FROM: Administration, Parks and Recreation

SUBJECT: 2000 Resource Bond Act Proposition 12 Per Capita Grant Program
Funds For Los Baños Sewer Discharge Project

RECOMMENDATION:

That Council increase appropriations and estimated revenues in the Parks and Recreation Capital Fund by \$25,000 based on receiving a \$50,000 Proposition 12 Per Capita Grant from the California Department of Parks and Recreation.

DISCUSSION:

Background

On March 7, 2000, California voters approved the Safe Neighborhood Parks, Clean Water, Clean Air, and Coastal Protection Bond Act of 2000, also known as Proposition 12. The intent of the Bond Act is to revive state stewardship of natural resources by investing in neighborhood parks and state parks, clean water protection, and coastal beaches and scenic areas.

Proposition 12 provided \$824.5 million for local projects, including \$338 million to be distributed on a per capita basis. The City of Santa Barbara's allocation for the Per Capita Grant Program is \$842,000. Parks and Recreation projects that benefit from per capita grant funds include the Franceschi Park Rehabilitation for \$300,000; Oak Park Bridge Replacement for \$130,000; Old Mission Creek Restoration at Bohnett Park for \$175,000; Dwight Murphy Park Sports Fencing and Bleacher Replacement for \$130,000; and the Tennis Lighting Control Project for \$57,000. Remaining funds of \$50,000 are allocated to the Los Baños Pool Discharge Project

Agenda Item No. _____

Los Baños Pool Discharge Project

Currently, when water from the Los Baños del Mar pool is emptied, it is discharged to a storm drain and then to the ocean. This method is not in compliance with the City's Storm Water Management Program and the National Pollutant Discharge Elimination System (NPDES) Phase II regulations of the Federal Clean Water Act. The purpose of the Los Baños Pool Discharge Project is to construct a connection to a nearby sewer main, allowing the discharge water to be treated at the El Estero Treatment Facility.

In order to receive the Per Capita funds, the California Department of Parks and Recreation requires the City to submit specific project applications once preliminary design and environmental review are complete. The City complied with this requirement and received a letter of acknowledgement from the State indicating that the application for the Los Baños Pool Discharge is complete.

Construction documents are complete, and the project is ready to be advertised and constructed. It is anticipated that the project will be completed by mid-December 2007.

BUDGET/FINANCIAL INFORMATION:

The total cost of the project, including design, permitting, and construction, is \$50,000. The Parks and Recreation Department originally budgeted \$25,000 for this project from expected Proposition 40 grant funds in FY 2006. However, after cost estimates were completed and staff determined that Proposition 12 was the more appropriate funding source, staff applied for a Proposition 12 grant in the amount of \$50,000.

There is currently \$25,000 in the Parks and Recreation capital budget. Therefore, the recommendation is to increase appropriations and estimated revenues by \$25,000. The Proposition 12 grant will cover the entire cost of the project.

SUSTAINABILITY IMPACT:

Historically, water from Los Baños pool and from backwashing the filters was discharged directly to the harbor. Although this was common practice at the time that the pool was constructed, it is no longer allowed under the Clean Water Act. Discharge of this water to the El Estero Wastewater Treatment Plant will ensure that it meets the Ocean Plan Standards at the time of discharge.
